

AGILE BUSINESS ANALYSIS

Agility lies at the core of change and BAs are the agents of change. Learn the fundamentals of requirements engineering and become a lifetime certified agile business analyst.

The course imparts of how RE methods and techniques can advantageously be applied in agile development processes, and how techniques from the agile approach can improve the RE practice.

The course is accredited by BCS for the professional certificate in Agile BA, and is designed to give the Business Analyst the skills needed to successfully elicit, anticipate, analyze, validate and champion requirements throughout an Agile project with reliance on high levels of adaptability, communication, progressive elaboration and stakeholders' collaboration.

The course will describe the most popular Agile approaches to take the Agile Business Analyst through the phases of an Agile project. It ensures extensive practice by attendees for gaining practical experience throughout the training.

You'll gain a broad understanding of business analysis, including:

- ✓ How to describe a range of agile methods (process, roles, principles)
- ✓ The role of business analysis in an agile team
- ✓ The use of agile analysis, modelling and documentation techniques
- ✓ How to analyse business goals and their decomposition
- ✓ How to evaluate whether an agile method is appropriate for a given situation
- ✓ Understanding how to apply user story techniques
- ✓ How to explain the techniques used to plan and manage an iteration
